

# GRANDPARENTS UNIVERSITY // 2025

TAKE PART IN THE BIGGEST CAMPUS EVENT OF THE SUMMER!

Grandparents University (GPU) is a two-day program designed for grandparents and their grandchildren, ages 7–14, that offers the ultimate opportunity to engage with both past and future Boilermakers.

- **Session 1:** Thursday, July 17 (1:30–4:30PM) and Friday, July 18 (9–11:30AM)
- **Session 2:** Thursday, July 24 (1:30–4:30PM) and Friday, July 25 (9–11:30AM)

## If you can relate to both the young and young at heart, GPU needs you!

GPU participants look forward to learning from top Boilermaker faculty and staff from across campus. Our instructors are encouraged to showcase their departments through various hands-on activities that will create lasting memories for their students.

*Please note: The GPU planning committee makes every effort to limit class size to 25 participants and will work to accommodate class size based on classroom space and activities.*

## Each instructor will:

- Receive a \$400 stipend per session (*lead instructors only*) to be used at their discretion to offset program expenses.
- Have the opportunity to showcase their department and current projects and highlight new facilities and technology.
- Be a superhero to hundreds of Boilermaker grandparents and grandchildren.

## Join us!
